

PAIN TREATMENT CASE STUDY ON THE EFFECTIVENESS OF BCR-THERAPIE (BIOLOGICAL CELL-REGULATION THERAPY) TO PAIN PATIENTS ON VARIOUS PAIN CONDITIONS

Objective:

To test the effectiveness of BCR-Therapie pain treatments with focus on 3 areas;

1. To evaluate the speed effect of BCR-Therapie treatment in just one session over a wide variety of pain conditions;
2. To evaluate the effect of repeat sessions of BCR-Therapie on pain conditions;
3. To evaluate the length of period the improvements to pain conditions can last.

Device used for Treatments:

Clinic-Master BCR-Therapy device with NanoPhotonentherapy.

Treatments performed by:

Mr. Prasob Kumar
Ms. Lydia Lui Sau Yee.

Premises:

The study was conducted by and at the premises of;

Sol Wellness
16/F Tin On Sing Commercial Building,
41-43 Graham Street,
Central, Hong Kong
Tel: 2581 9699

Patient samples:

All patients were from the client base of Sol Wellness.

Results:

PATIENT NAME	AGE	OCCUPATION	PAIN COMPLAINT	PAIN LEVEL before treatment (1 - 10)	PAIN LEVEL after treatment (1 - 10)	COMMENTS
JULIE COOK	55	PHYSIO- THERAPIST	FROZEN SHOULDER	10	8	Very severe Frozen Shoulder. After... Pain measurements are while stretching arm. Mobility also improved slightly.
WAI-LING TSE (Repeat patient session 1 of 3)	42	YOGA TEACHER	KNEE PAIN	5	5	Knee pain only when climbing stairs. After... No improvement in pain.

PATIENT NAME	AGE	OCCUPATION	PAIN COMPLAINT	PAIN LEVEL before treatment (1 - 10)	PAIN LEVEL after treatment (1 - 10)	COMMENTS
XOMARA PEREZ	62	JOURNALIST/ DIPLOMAT	LOWER BACK PAIN / SCIATICA	6	2	Chronic but not very severe. Tested pain while moving and bending. After... pain substantially reduced.
ROSE CHAN (Repeat patient session 1 of 2)	46	HOUSE WIFE	NECK PAIN / STIFFNESS	9	8	Neck pain. Not a very severe pain situation, though pain level indications were high. After... Stiffness reduced but trigger point pain still there. Did not complete nano therapy
ROBERT GRIEVES	60	PR	HARD TISSUE IN THE PALM AND RESTRICTIVE MOVEMENT OF FINGERS	4	1	A rare hard tissue with pain inside the palm. Used hand probes. After... hard tissue softened and shrunk and fingers moved more freely
VANGELIS LEGAKIS		Dancer	NECK AND SHOULDER PAIN	4	0	Cervical Spondylosis. After... neck can move freely, can't feel anymore pain at all. Treated spine, muscle and use nano light on trigger points.
MOHANLAL MAHBUBANI	80	RETIRED	BACK PAIN/FROZEN SHOULDER	9	7	Extreme case of slipped disc. Had spine surgery many years ago. Situation so bad walking posture was affected for years. After... machine readings show good improvement. Need many repeat treatments and also need to correct walking posture.
ANNEMIEK BURGER		THERAPIST	MUSCLE SPASM	N/A	N/A	Work related muscle pain. After... shoulder more relaxed, arm still has tiredness. Not a pain case
Sheila Partrat		Business	STIFFNESS IN CALF MUSCLE	N/A	N/A	No pain but a tightness in calf muscle, Very athletic structure. After... feel less knotted.
Terumi Hoki			ADAENOMIOSYS (TUMOURS IN UTERUS) BLOATED AND TOUCHING THE SKIN SURFACE CAN FEEL THE PAIN, PRESSING VERY PAINFUL	N/A	N/A	Adenomyosis. During some menstrual periods the pain becomes so severe need to call ambulance. Before the session it was painful when touching the skin surface. After... felt less bloated, no pain when touching the skin surface, pains only when pressing hard. Patient also reported that bleeding reduced.
SHEILA MAHBUBANI		RETIRED	BACK PAIN	5	3	Not a very severe back pain case. After... pain reduced noticeably.
SHEILA MAHBUBANI (repeat patient session 1 of 2)		RETIRED	RIGHT KNEE PAIN	4	0	Arthritis. After... found no pain at all.
CINDY WU	35	BRANDING	LOWER BACK TAILBONE PAIN	4	3	Had an injury to tail bone in the past. After... Small reduction in pain.

PATIENT NAME	AGE	OCCUPATION	PAIN COMPLAINT	PAIN LEVEL before treatment (1 - 10)	PAIN LEVEL after treatment (1 - 10)	COMMENTS
KATHERINE CHOY WAI WAH (Repeat patient session 1 of 2)	41	HOUSEWIFE	CANCER PAIN	7	1 - 2	Cancer pain. Pains in the chest when coughing so severe had to hold the chest. After... pain reduced to a level where it still pains when coughing but no need to hold the chest. Patient was happy and wants to treat again.
MAUREEN MUELLER	51	COUNSELLOR	NECK PAIN	5	2	Work related neck/shoulder pain. After...felt much better
JACINTA CHANG (Repeat patient session 1 of 2)	71	RETIRED	KNEE PAIN	6-7	2-3	Knee pain. After... was very impressed and called husband to come, also made booking for the next day.
D.T. CHANG	75	RETIRED	LOWER BACK PAIN / SCIATICA	4	2	Very skeptical patient. Very severe case. Had spine surgery before. Unable to walk straight. Using walking stick. After... very slight improvement. Need many repeat treatments and also need to correct walking posture.
SHEILA MAHBUBANI (Repeat patient session 2 of 2)		RETIRED	RIGHT KNEE PAIN	2	1	Arthritis. Slighter pain came back the next morning then subsided
DINESH MAHBUBANI	50	TRADER	PAIN IN MID BACK	6	3	Muscle pain. Started very skeptical, After...felt much better and is coming back again.
JACINTA CHANG (Repeat patient session 2 of 2)	71	RETIRED	KNEE PAIN	1-2	0 - 0.05	No more pain but slight discomfort. Had hamstring muscle training same morning. Discomfort is suspected to be muscle ache.
WAI LING (Repeat patient session 2 of 3)	42	YOGA TEACHER	KNEE PAIN	5	2.5	Knee pain only when climbing stairs. After...Pain has reduced after changing program from Arthritis to Arthrosis.
MONA SHANTA MULCHAND	71	RETIRED	KNEE PAIN	6	4	Arthritis and possible ligament rupture. Machine's diagnosis showed severe inflammation. Treated for Arthritis. After... one leg better but other leg has severe pain even when lifting the leg in sleeping position. Suspect some internal injury in that leg.
ROSE CHAN (Repeat patient session 2 of 2)	46	HOUSE WIFE	NECK PAIN / STIFFNESS	N/A	N/A	RSI from housework. Not a very severe pain situation. After...Stiffness reduced and felt more loose.

PATIENT NAME	AGE	OCCUPATION	PAIN COMPLAINT	PAIN LEVEL before treatment (1 - 10)	PAIN LEVEL after treatment (1 - 10)	COMMENTS
TSUI KWOK CHUNG	35	TENNIS COACH (HKTA)	SHOULDER MUSCLE PAIN	4	4	Suspect Muscle spasm or muscle tear. Pain on movement and on pressing the area. After... no more pain when pressing the area but still pains on movements. Several sessions should give better relief.
KATHERINE CHOY WAI WAH (Repeat patient session 2 of 2)	41		CANCER PAIN	10	10	Cancer pain. Cough and pain was very bad from the day before. After... coughing profusely and pain level was the same. Patient reported that there has been lots of phlegm coming out since the last treatment. It was something new.
PANG KIREN	28	TENNIS COACH (HKTA)	BACK MUSCLE PAIN	7	4	Muscle spasm. After... felt much looser and relaxed.
ERIC CHIU	40	TENNIS COACH (HKTA)	ROTATOR CUFF INJURY	6-7	4	Rotator cuff injury sustained 20 years ago. Pain level measured when swinging the hand. After... movement improved, pain level reduced. Patient had a feeling that something has happened inside. He could not believe his 20 year old injury could see such a quick response in one session.
WAILING TSE (Repeat patient session 3 of 3)	42	YOGA TEACHER	KNEE PAIN	2.5	1	Knee pain only when climbing stairs. After... Pain has reduced further
ANITHA CHAN	66	HOUSE WIFE	SPRAINED SWOLLOEN ANKLE	7	3	Sprained and swollen ankle. Able to walk with slight limb. After... Pain reduced. Felt much better while walking.
ALLISON LUENG	44	VENUE MANAGER	MUSCLE SPASM IN THE SHOULDER BACK WITH A CLEARLY VISIBLE LUMP. JUST COMPLETED AN EVENT. CARRIED HEAVY STUFF.	4-5	3	Stiff shoulder. Over worked in an event carrying heavy things. Had a visible lump in the shoulder. After... Pain reduced. Felt looser and could move better.
JASPER CHOW	30	EVENT OPERATIONS EXECUTIVE	STIFF SHOULDER AFTER COMPLETING AN EVENT. HAD TO CARRY HEAVY THINGS	N/A	N/A	Not a pain case. After... Felt looser.

Conclusion:

There were a total of 31 treatments done over a period of 5 days. 5 patients came back for repeat treatments.

Pain problems of patients tested included mild to severe pains from work related RSI, Geriatric pains, Sports pains and Cancer pain.

It was a significant finding that all patients had some degree of pain reduction just after the first session. This included the very severe and chronic pain cases as well. It was also a significant finding that no patient reported an increase in pain or any other form of adverse side effects after BCR-Therapie treatments. Some Chronic pain patients experienced a slight increase in pain the following day which reduced a while later. Generally patients felt the treatments to be painless and comfortable.

5 patients returned for repeat treatments during the study period. Among these repeat patients there has been a further reduction in pain level after the repeat treatments. More repeats may be needed to form a stronger conclusion on the effect of repeat treatments in further reducing pain levels.

To form a conclusion on how long the pain relief will last, it is felt that more repeat treatments and a longer period of study may be necessary.

Note: The telephone numbers of the patients are excluded to protect their privacy. The telephone numbers can be obtained by contacting Mrs. Chan Cudennec of Sol Wellness.
